

Title X in Utah Improving Public Health and Saving Taxpayer Dollars

**Between FY2010 - FY2013, funding for Title X was cut by \$39.2 million—
12.3% in three fiscal years.**

Title X Served 39,626 Utah Residents in 2013

The Planned Parenthood Association of Utah is the sole Title X grantee in Utah, supporting 15 Title X-funded health centers across the state.ⁱ The Title X network served 34,275 women and 5,351 men, for a total of 39,626 residents of Utah in 2013.ⁱⁱ

Title X provides high-quality family planning services and other preventive health care to low-income and uninsured individuals who may otherwise lack access to health care.

- Of the 39,626 patients served, 74% had incomes at or below 100% of the federal poverty level (FPL), ***meaning they earned \$11,490 a year or less.***ⁱⁱⁱ
- ***Ninety-six percent*** of Title X patients in Utah ***earned less than \$28,725*** a year (250% of the FPL).^{iv}

Title X Saves Utah Residents' Taxpayer Dollars

Title X supports critical infrastructure needs that are not reimbursable under Medicaid or commercial insurance, such as staff salaries, individual patient education, community-level outreach, and public education about family planning, women's health, and sexual health issues. Without Title X, access to high-quality family planning services for low-income Utah residents would not be possible.

- The average cost of a Medicaid-funded birth is \$12,613.^v In 2008, births resulting from unintended pregnancies cost Utah's taxpayers \$107 million.^{vi}
- The Title X program helps alleviate these costs by preventing unintended pregnancy through contraception, counseling, and other services.^{vii}

Title X is Essential to Improving Public Health and Saving Taxpayer Dollars in Utah

Cutting funding for family planning services will lead to more unintended pregnancies and higher health care costs in Utah. Family planning helps women and families plan the timing and spacing of their pregnancies, which results in better educational attainment and economic security; these, in turn, are linked to better health outcomes for women and families.

➤ Family planning services at Utah's Title X-funded health centers helped prevent 8,800 unintended pregnancies in 2012, which would likely have resulted in 4,400 unintended births and 3,000 abortions.^{viii}

➤ Without publicly funded family planning, the number of unintended pregnancies in Utah would be 23% higher.^{ix}

➤ Title X-funded services produce significant cost savings to the federal and state governments; services provided at Title X-supported sites in Utah accounted for \$44.6 million in such savings in 2010 alone.^x

Utah's Title X-funded health centers provide a wide range of services:

- Pregnancy testing
- Contraceptive services
- Pelvic exams
- Screening for cervical and breast cancer
- Screening for high blood pressure, anemia, and diabetes
- Screening for STDs and HIV/AIDS
- Infertility services
- Health education
- Referrals for other health and social services

Additional cuts to Title X funding—especially in the current economy—would harm tens of thousands of low-income and poor families throughout Utah, in turn costing, not saving, the federal government money.
