

Title X in Tennessee Improving Public Health and Saving Taxpayer Dollars

**Between FY2010 - FY2013, funding for Title X was cut by \$39.2 million—
12.3% in three fiscal years.**

Title X Served 101,510 Tennessee Residents in 2013

The Tennessee Department of Health Family Planning Program and Planned Parenthood of the Greater Memphis Region are the two Title X grantees in Tennessee, supporting 129 Title X-funded health centers across the state.ⁱ The Title X network served 100,742 women and 768 men, for a total of 101,510 residents of Tennessee in 2013.ⁱⁱ

Title X provides high-quality family planning services and other preventive health care to low-income and uninsured individuals who may otherwise lack access to health care.

- Of the 101,510 patients served, 81% had incomes at or below 100% of the federal poverty level (FPL), ***meaning they earned \$11,490 a year or less.***ⁱⁱⁱ
- ***Ninety-seven percent*** of Title X patients in Tennessee ***earned less than \$28,725*** a year (250% of the FPL).^{iv}

Title X Saves Tennessee Residents' Taxpayer Dollars

Title X supports critical infrastructure needs that are not reimbursable under Medicaid or commercial insurance, such as staff salaries, individual patient education, community-level outreach, and public education about family planning, women's health, and sexual health issues. Without Title X, access to high-quality family planning services for low-income Tennessee residents would not be possible.

- The average cost of a Medicaid-funded birth is \$12,613.^v In 2008, births resulting from unintended pregnancies cost Tennessee's taxpayers \$378 million.^{vi}
- The Title X program helps alleviate these costs by preventing unintended pregnancy through contraception, counseling, and other services.^{vii}

Title X is Essential to Improving Public Health and Saving Taxpayer Dollars in Tennessee

Cutting funding for family planning services will lead to more unintended pregnancies and higher health care costs in Tennessee. Family planning helps women and families plan the timing and spacing of their pregnancies, which results in better educational attainment and economic security; these, in turn, are linked to better health outcomes for women and families.

➤ Family planning services at Tennessee's Title X-funded health centers helped prevent 26,300 unintended pregnancies in 2012, which would likely have resulted in 13,000 unintended births and 9,000 abortions.^{viii}

➤ Without publicly funded family planning, the number of unintended pregnancies in Tennessee would be 22% higher.^{ix}

➤ Title X-funded services produce significant cost savings to the federal and state governments; services provided at Title X-supported sites in Tennessee accounted for \$61.2 million in such savings in 2010 alone.^x

Tennessee's Title X-funded health centers provide a wide range of services:

- Pregnancy testing
- Contraceptive services
- Pelvic exams
- Screening for cervical and breast cancer
- Screening for high blood pressure, anemia, and diabetes
- Screening for STDs and HIV/AIDS
- Infertility services
- Health education
- Referrals for other health and social services

Additional cuts to Title X funding—especially in the current economy—would harm tens of thousands of low-income and poor families throughout Tennessee, in turn costing, not saving, the federal government money.
