

Title X in Nevada Improving Public Health and Saving Taxpayer Dollars

**Between FY2010 - FY2013, funding for Title X was cut by \$39.2 million—
12.3% in three fiscal years.**

Title X Served 20,470 Nevada Residents in 2013

Carson City Health and Human Services, the Southern Nevada Health District, the Washoe County District Health Department Family Planning Program, and the Nevada State Division of Health Community Health Nurse Program are the Title X grantees in Nevada, supporting 18 Title X-funded health centers across the state.ⁱ The Title X network served 19,414 women and 1,056 men, for a total of 20,470 residents of Nevada in 2013.ⁱⁱ

Title X provides high-quality family planning services and other preventive health care to low-income and uninsured individuals who may otherwise lack access to health care.

- Of the 20,470 patients served, 67% had incomes at or below 100% the federal poverty line (FPL), **meaning they earned \$11,490 a year or less.**ⁱⁱⁱ
- **Ninety percent** of Title X patients in Nevada **earned less than \$28,725** a year (250% of the FPL).^{iv}

Title X Saves Nevada Residents' Taxpayer Dollars

Title X supports critical infrastructure needs that are not reimbursable under Medicaid or commercial insurance, such as staff salaries, individual patient education, community-level outreach, and public education about family planning, women's health, and sexual health issues. Without Title X, access to high-quality family planning services for low-income Nevada residents would not be possible.

- The average cost of a Medicaid-funded birth is \$12,613.^v In 2008, births resulting from unintended pregnancies cost Nevada's taxpayers \$74 million.^{vi}
- The Title X program helps alleviate these costs by preventing unintended pregnancy through contraception, counseling, and other services.^{vii}

Title X is Essential to Improving Public Health and Saving Taxpayer Dollars in Nevada

Cutting funding for family planning services will lead to more unintended pregnancies and higher health care costs in Nevada. Family planning helps women and families plan the timing and spacing of their pregnancies, which results in better educational attainment and economic security; these, in turn, are linked to better health outcomes for women and families.

- Family planning services at Nevada's Title X-funded health centers helped prevent 5,400 unintended pregnancies in 2012, which would likely have resulted in 2,700 unintended births and 1,800 abortions.^{viii}
- Without publicly funded family planning, the number of unintended pregnancies in Nevada would be 15% higher.^{ix}
- Title X-funded services produce significant cost savings to the federal and state governments; services provided at Title X-supported sites in Nevada accounted for \$13 million in such savings in 2010 alone.^x

Nevada's Title X-funded health centers provide a wide range of services:

- Pregnancy testing
- Contraceptive services
- Pelvic exams
- Screening for cervical and breast cancer
- Screening for high blood pressure, anemia, and diabetes
- Screening for STDs and HIV/AIDS
- Infertility services
- Health education
- Referrals for other health and social services

Additional cuts to Title X funding—especially in the current economy—would harm tens of thousands of low-income and poor families throughout Nevada, in turn costing, not saving, the federal government money.
