

## Title X in Kentucky Improving Public Health and Saving Taxpayer Dollars

**Between FY2010 - FY2013, funding for Title X was cut by \$39.2 million—  
12.3% in three fiscal years.**

### Title X Served 86,930 Kentucky Residents in 2013

The Kentucky Cabinet for Health and Family Services is the sole Title X grantee in Kentucky, supporting 139 Title X-funded health centers across the state.<sup>i</sup> The Title X network served 81,794 women and 5,136 men, for a total of 86,930 residents of Kentucky in 2013.<sup>ii</sup>

*Title X provides high-quality family planning services and other preventive health care to low-income and uninsured individuals who may otherwise lack access to health care.*

- Of the 86,930 patients served, 77% had incomes at or below 100% of the federal poverty level (FPL), ***meaning they earned \$11,490 a year or less.***<sup>iii</sup>
- ***Ninety-five percent*** of Title X patients in Kentucky ***earned less than \$28,725*** a year (250% of the FPL).<sup>iv</sup>

### Title X Saves Kentucky Residents' Taxpayer Dollars

Title X supports critical infrastructure needs that are not reimbursable under Medicaid or commercial insurance, such as staff salaries, individual patient education, community-level outreach, and public education about family planning, women's health, and sexual health issues. Without Title X, access to high-quality family planning services for low-income Kentucky residents would not be possible.

- The average cost of a Medicaid-funded birth is \$12,613.<sup>v</sup> In 2008, births resulting from unintended pregnancies cost Kentucky's taxpayers \$ 263 million.<sup>vi</sup>
- The Title X program helps alleviate these costs by preventing unintended pregnancy through contraception, counseling, and other services.<sup>vii</sup>

## Title X is Essential to Improving Public Health and Saving Taxpayer Dollars in Kentucky

Cutting funding for family planning services will lead to more unintended pregnancies and higher health care costs in Kentucky. Family planning helps women and families plan the timing and spacing of their pregnancies, which results in better educational attainment and economic security; these, in turn, are linked to better health outcomes for women and families.

- Family planning services at Kentucky's Title X-funded health centers helped prevent 22,300 unintended pregnancies in 2012, which would likely have resulted in 11,100 unintended births and 7,600 abortions.<sup>viii</sup>
- Without publicly funded family planning, the number of unintended pregnancies in Kentucky would be 67% higher.<sup>ix</sup>
- Title X-funded services produce significant cost savings to the federal and state governments; services provided at Title X-supported sites in Kentucky accounted for \$148.8 million in such savings in 2010 alone.<sup>x</sup>

### ***Kentucky's Title X-funded health centers provide a wide range of services:***

- Pregnancy testing
- Contraceptive services
- Pelvic exams
- Screening for cervical and breast cancer
- Screening for high blood pressure, anemia, and diabetes
- Screening for STDs and HIV/AIDS
- Infertility services
- Health education
- Referrals for other health and social services

**Additional cuts to Title X funding—especially in the current economy—would harm tens of thousands of low-income and poor families throughout Kentucky, in turn costing, not saving, the federal government money.**
