

Title X-funded health centers helped women avoid one million unintended pregnancies in 2013, which prevented 501,000 unplanned births and 345,000 abortions.

Despite these positive health impacts, federal funding for Title X has shrunk, and now fewer low-income and uninsured people across the country, and in Vermont, are able to access family planning and sexual health services funded by Title X.

	FY 2010	FY 2011	FY 2012	FY 2013	FY2014	FY 2015	Net Change

WHY TITLE X MATTERS

In 2010, Planned Parenthood of Southern New England, a subrecipient of the Vermont Department of Health, closed one of its sites, which drove down patient numbers. However, in 2012, the Planned Parenthood affiliate included two additional sites in its network, and by the end of the year, the site that closed in 2010 reopened. The net increase of two health centers since 2010 explains an increase in patient volume.

I rely on my provider to provide quality care when I need it.

My provider is trustworthy and supportive. It's where I prefer to go to get the high-quality health care I count on.

CONFIDENTIAL

Title X guarantees confidentiality protections that cannot be found elsewhere.

6 out of **10** women who turn to Title X family planning say it is their regular source for care.
