

Title X in Florida Improving Public Health and Saving Taxpayer Dollars

Between FY2005 – FY2015, funding for Title X was cut by \$150 million – 10% in ten fiscal years.

Title X Served 136,352 Florida Residents in 2015

The Florida Department of Health is the sole Title X grantee in Florida, ⁱ supporting 160 Title X-funded health centers across the state including local health department service sites and Planned Parenthoods.ⁱⁱ The Title X network served 133,889 women and 2,463 men, for a total of 136,352 residents of Florida in 2015.ⁱⁱⁱ

Title X provides high-quality family planning services and other preventive health care to low-income and uninsured individuals who may otherwise lack access to health care.

- Of the 136,352 patients served, **56%** had incomes at or below 100% of the federal poverty level (FPL), ^{iv} **meaning they earned \$11,770 a year or less.** ^v
- **Seventy-four percent** of Title X patients in Florida **earned less than \$29,425** ^{vi} a year (250% of the FPL).^{vii}

Title X Saves Florida's Taxpayer Dollars

Title X supports critical infrastructure needs that are not reimbursable under Medicaid and commercial insurance, such as staff salaries, individual patient education, community-level outreach, and public education about family planning, women's health, and sexual health issues. Without Title X, access to high-quality family planning services for low-income Floridians would not be possible.

- The average cost of a Medicaid-funded birth is \$10,748.^{viii} In 2010, births resulting from unintended pregnancies cost Florida's taxpayers \$1.3 billion.^{ix}
- The Title X program helps alleviate the costs of unintended pregnancy through contraception, counseling, and other services.^x

Title X is Essential to Improving Public Health and Saving Taxpayer Dollars in Florida

Cutting funding for family planning services will lead to more unintended pregnancies and higher health care costs in Florida. Family planning helps women and families plan the timing and spacing of their pregnancies, which results in better educational attainment and economic security; these, in turn, are linked to better health outcomes for women, men, and families.

- Family planning services at Florida's Title X-funded health centers helped prevent 38,700 unintended pregnancies in 2014, which would likely have resulted in 18,800 unintended births and 14,000 abortions.^{xi}
- Without publicly funded family planning, the number of unintended pregnancies in Florida would be 19% higher.^{xii}
- Title X-funded services produce significant cost savings to the federal and state governments; services provided at Title X-supported sites in Florida accounted for nearly \$202 million in such savings in 2010 alone.^{xiii}

Florida's Title X-funded health centers provide a wide range of services:

- Pregnancy testing
- Contraceptive services
- Pelvic exams
- Screening for cervical and breast cancer
- Screening for high blood pressure, anemia, and diabetes
- Screening for STDs and HIV/AIDS
- Infertility services
- Health education
- Referrals for other health and social services

Additional cuts to Title X funding—especially in the current economy—would harm hundreds of thousands of low-income and poor families throughout Florida, in turn costing, not saving, the federal government money.
