

Title X in Kansas Improving Public Health and Saving Taxpayer Dollars

Between FY2005 – FY2015, funding for Title X was cut by \$150 million – 10% in ten fiscal years.

Title X Served 24,047 Kansas Residents in 2015

The Kansas Department of Health and Environment is the sole Title X grantee in Kansas, ⁱ supporting 59 Title X-funded health centers across the state, all of which are local health department service sites.ⁱⁱ The Title X network served 21,814 women and 2,233 men, for a total of 24,047 residents of Kansas in 2015.ⁱⁱⁱ

Title X provides high-quality family planning services and other preventive health care to low-income and uninsured individuals who may otherwise lack access to health care.

- Of the 24,047 patients served, **74%** had incomes at or below 100% of the federal poverty level (FPL), ^{iv} **meaning they earned \$11,770 a year or less.** ^v
- **Ninety-three percent** of Title X patients in Kansas **earned less than \$29,425.** ^{vi} a year (250% of the FPL).^{vii}

Title X Saves Kansas's Taxpayer Dollars

Title X supports critical infrastructure needs that are not reimbursable under Medicaid and commercial insurance, such as staff salaries, individual patient education, community-level outreach, and public education about family planning, women's health, and sexual health issues. Without Title X, access to high-quality family planning services for low-income Kansas residents would not be possible.

- The average cost of a Medicaid-funded birth is \$13,947.^{viii} In 2010, births resulting from unintended pregnancies cost Kansas's taxpayers \$166.1 million.^{ix}
- The Title X program helps alleviate the costs of unintended pregnancy through contraception, counseling, and other services.^x

Title X is Essential to Improving Public Health and Saving Taxpayer Dollars in Kansas

Cutting funding for family planning services will lead to more unintended pregnancies and higher health care costs in Kansas. Family planning helps women and families plan the timing and spacing of their pregnancies, which results in better educational attainment and economic security; these, in turn, are linked to better health outcomes for women, men, and families.

- Family planning services at Kansas's Title X-funded health centers helped prevent 6,300 unintended pregnancies in 2014, which would likely have resulted in 3,100 unintended births and 2,300 abortions.^{xi}
- Without publicly funded family planning, the number of unintended pregnancies in Kansas would be 26% higher.^{xii}
- Title X-funded services produce significant cost savings to the federal and state governments; services provided at Title X-supported sites in Kansas accounted for nearly \$64.2 million in such savings in 2010 alone.^{xiii}

Kansas's Title X-funded health centers provide a wide range of services:

- Pregnancy testing
- Contraceptive services
- Pelvic exams
- Screening for cervical and breast cancer
- Screening for high blood pressure, anemia, and diabetes
- Screening for STDs and HIV/AIDS
- Infertility services
- Health education
- Referrals for other health and social services

Additional cuts to Title X funding—especially in the current economy—would harm [tens of thousands of low-income and poor families throughout Kansas, in turn costing, not saving, the federal government money.]
