

## Title X in Tennessee Improving Public Health and Saving Taxpayer Dollars

**Between FY2005 – FY2015, funding for Title X was cut by \$150 million – 10% in ten fiscal years.**

### Title X Served 75,356 Tennessee Residents in 2015

The Tennessee Department of Health Family Planning Program is the sole Title X grantee in Tennessee, <sup>i</sup> supporting 126 Title X-funded health centers across the state including local health department service sites and federally qualified health centers.<sup>ii</sup> The Title X network served 74,851 women and 505 men, for a total of 75,356 residents of Tennessee in 2015.<sup>iii</sup>

*Title X provides high-quality family planning services and other preventive health care to low-income and uninsured individuals who may otherwise lack access to health care.*

- Of the 75,356 patients served, **78%** had incomes at or below 100% of the federal poverty level (FPL), <sup>iv</sup> **meaning they earned \$11,770 a year or less.** <sup>v</sup>
- **Ninety-four percent** of Title X patients in Tennessee **earned less than \$29,425**.<sup>vi</sup> a year (250% of the FPL).<sup>vii</sup>

### Title X Saves Tennessee's Taxpayer Dollars

Title X supports critical infrastructure needs that are not reimbursable under Medicaid and commercial insurance, such as staff salaries, individual patient education, community-level outreach, and public education about family planning, women's health, and sexual health issues. Without Title X, access to high-quality family planning services for low-income Tennesseans would not be possible.

- The average cost of a Medicaid-funded birth is \$7,657.<sup>viii</sup> In 2010, births resulting from unintended pregnancies cost Tennessee's taxpayers \$530.7 million.<sup>ix</sup>
- The Title X program helps alleviate the costs of unintended pregnancy through contraception, counseling, and other services.<sup>x</sup>

## Title X is Essential to Improving Public Health and Saving Taxpayer Dollars in Tennessee

Cutting funding for family planning services will lead to more unintended pregnancies and higher health care costs in Tennessee. Family planning helps women and families plan the timing and spacing of their pregnancies, which results in better educational attainment and economic security; these, in turn, are linked to better health outcomes for women, men, and families.

➤ Family planning services at Tennessee's Title X-funded health centers helped prevent 22,500 unintended pregnancies in 2014, which would likely have resulted in 10,900 unintended births and 8,100 abortions.<sup>xi</sup>

➤ Without publicly funded family planning, the number of unintended pregnancies in Tennessee would be 36% higher.<sup>xii</sup>

➤ Title X-funded services produce significant cost savings to the federal and state governments; services provided at Title X-supported sites in Tennessee accounted for nearly \$115 million in such savings in 2010 alone.<sup>xiii</sup>

### *Tennessee's Title X-funded health centers provide a wide range of services:*

- Pregnancy testing
- Contraceptive services
- Pelvic exams
- Screening for cervical and breast cancer
- Screening for high blood pressure, anemia, and diabetes
- Screening for STDs and HIV/AIDS
- Infertility services
- Health education
- Referrals for other health and social services

**Additional cuts to Title X funding—especially in the current economy—would harm tens of thousands of low-income and poor families throughout Tennessee, in turn costing, not saving, the federal government money.**
