

Title X in Texas Improving Public Health and Saving Taxpayer Dollars

Between FY2005 – FY2015, funding for Title X was cut by \$150 million – 10% in ten fiscal years.

Title X Served 166,538 Texas Residents in 2015

The Women's Health and Family Planning Association of Texas is the sole Title X grantee in Texas, ⁱ supporting 92 Title X-funded health centers across the state including federally qualified health centers, hospitals, local health department service sites, Planned Parenthoods, and private non-profits.ⁱⁱ The Title X network served 150,724 women and 15,814 men, for a total of 166,538 residents of Texas in 2015.ⁱⁱⁱ

Title X provides high-quality family planning services and other preventive health care to low-income and uninsured individuals who may otherwise lack access to health care.

- Of the 166,538 patients served, **56%** had incomes at or below 100% of the federal poverty level (FPL), ^{iv} **meaning they earned \$11,770 a year or less.** ^v
- **Sixty-nine percent** of Title X patients in Texas **earned less than \$29,425.** ^{vi} a year (250% of the FPL).^{vii}

Title X Saves Texas's Taxpayer Dollars

Title X supports critical infrastructure needs that are not reimbursable under Medicaid and commercial insurance, such as staff salaries, individual patient education, community-level outreach, and public education about family planning, women's health, and sexual health issues. Without Title X, access to high-quality family planning services for low-income Texans would not be possible.

- The average cost of a Medicaid-funded birth is \$11,574.^{viii} In 2010, births resulting from unintended pregnancies cost Texas's taxpayers \$2.9 billion.^{ix}
- The Title X program helps alleviate the costs of unintended pregnancy through contraception, counseling, and other services.^x

Title X is Essential to Improving Public Health and Saving Taxpayer Dollars in Texas

Cutting funding for family planning services will lead to more unintended pregnancies and higher health care costs in Texas. Family planning helps women and families plan the timing and spacing of their pregnancies, which results in better educational attainment and economic security; these, in turn, are linked to better health outcomes for women, men, and families.

- Family planning services at Texas's Title X-funded health centers helped prevent 26,000 unintended pregnancies in 2014, which would likely have resulted in 12,600 unintended births and 9,400 abortions.^{xi}
- Without publicly funded family planning, the number of unintended pregnancies in Texas would be 9% higher.^{xii}
- Title X-funded services produce significant cost savings to the federal and state governments; services provided at Title X-supported sites in Texas accounted for nearly \$435.8 million in such savings in 2010 alone.^{xiii}

Texas's Title X-funded health centers provide a wide range of services:

- Pregnancy testing
- Contraceptive services
- Pelvic exams
- Screening for cervical and breast cancer
- Screening for high blood pressure, anemia, and diabetes
- Screening for STDs and HIV/AIDS
- Infertility services
- Health education
- Referrals for other health and social services

Additional cuts to Title X funding—especially in the current economy—would harm hundreds of thousands of low-income and poor families throughout Texas, in turn costing, not saving, the federal government money.
