

THE TITLE X FAMILY PLANNING PROGRAM IN Alaska

The Alaska Department of Health & Human Services and Planned Parenthood of the Great Northwest and the Hawaiian Islands are the Title X grantees in Alaska. The diverse network of health centers supported by Title X provides a range of essential preventive health services, including breast and cervical cancer detection, screening and treatment for sexually transmitted diseases, HIV testing, and contraception, for thousands of low-income, uninsured, and underinsured individuals and families each year who would otherwise lack access to care.

Despite this important mission, federal funding for Title X has shrunk in recent years, and now fewer low-income and uninsured people the United States are able to access family planning and sexual health services funded by Title X.
