

THE TITLE X FAMILY PLANNING PROGRAM IN Florida

As of September 1, 2018, the Office of Population Affairs (OPA) provided Title X service delivery grants to Community Health Centers of Pinellas and the Florida Department of Health to support access to family planning and sexual health services in Florida. The diverse network of health centers supported by Title X provides a range of essential preventive health services, including breast and cervical cancer detection, screening and treatment for sexually transmitted diseases, HIV testing, and contraception, for thousands of low-income, uninsured, and underinsured individuals and families each year who would otherwise lack access to care.

Despite this important mission, federal funding for Title X has shrunk in recent years, and now fewer low-income and uninsured people in Florida are able to access family planning and sexual health services funded by Title X.
