

THE TITLE X FAMILY PLANNING PROGRAM IN Nevada

As of September 1, 2018, the Office of Population Affairs (OPA) provided Title X service delivery grants to The Carson City Department of Health & Human Services, the Nevada Department of Health and Human Services, Nevada Health Centers, Nevada Primary Care Association, the Southern Nevada Health District, and the Washoe County Health District to support access to family planning and sexual health services in Nevada. The diverse network of health centers supported by Title X provides a range of essential preventive health services, including breast and cervical cancer detection, screening and treatment for sexually transmitted diseases, HIV testing, and contraception, for thousands of low-income, uninsured, and underinsured individuals and families each year who would otherwise lack access to care.

Despite this important mission, federal funding for Title X has shrunk in recent years, and now fewer low-income and uninsured people in Nevada are able to access family planning and sexual health services funded by Title X.
