

TITLE X'S ROLE New York

National
Family Planning
& Reproductive Health Association

The Title X ("ten") family planning program is critical to providing and maintaining access to family planning services for people with low and no incomes and people who are un- or under-insured. This mission has been threatened by years of insufficient funding and politically motivated attacks, leaving millions without access to federally supported services.

¹ If a state has no federally funded family planning expansion, the percentage given is for childless adults to access full benefit Medicaid.

² 24* indicates that state law bars abortion after fetal viability, which providers may determine on an individual basis, so the deadline may be later. Abortions may also be permitted in certain circumstances after viability. However, in certain states with this cut-off there are not clinics that offer care to the legal limit.

³ The grantees list includes any grantee that was awarded funds in that year. Additional organizations may have had funds for a grant that ended partway through the year.

⁴ This count includes any service site that participated for any portion of the year.
